(2) Develops a resident-specific intervention plan in coordination with the service planning team and provides recommendations for revisions to the individual service plan if necessary to prevent or minimize the likelihood of future crisis situations. The intervention plan must include a transition plan to aid the resident in returning to the community-based ICF/MR if the resident is receiving residential crisis services.

(3) Consults with and provides training and ongoing technical assistance to the resident's service providers to aid in the implementation of the intervention plan and revisions to the individual service plan.

(4) Provides residential crisis services in an alternative, state-licensed setting approved by the Department when a facility is not able, as determined by the Department, to provide the intervention and protection of the resident and others living with the resident that is necessary to prevent the resident from requiring placement in a more restrictive institutional setting.

**METHODS AND STANDARDS FOR DETERMINING PAYMENT RATES
PRIOR TO OCTOBER 1, 2000 FOR SERVICES PROVIDED BY
INTERMEDIATE CARE FACILITIES FOR THE MENTALLY RETARDED
(ICFs/MR) WHICH ARE NOT STATE-OWNED**

SECTION 1.000 INTRODUCTION.

Section 1.010 **General purpose.** The purpose of Minnesota's methods and standards for determining medical assistance payment rates for ICFs/MR that are not state-owned is to provide for rates in conformity with applicable state and federal laws, regulations and quality and safety standards. Minnesota has in place a public process which complies with the requirements of Section 1902(a)(13)(A) of the Social Security Act. In determining the rates, the Department of Human Services takes into account the provider's historical costs, the size of the facility, and other factors.

Facilities participating in the Minnesota Medical Assistance Program are paid by a prospective rate-setting methodology. This methodology, established in Minnesota statutes and rules, is described in this attachment. This attachment describes policies concerning cost classification and allocation procedures, both allowable and nonallowable costs, reporting requirements, cost allocation and classification principles, appeal procedures, and rate-setting procedures for newly established facilities or approved facility Class A to Class B bed conversions.

Section 1.020 **Overview.** A very brief description of the overall rate setting mechanism will be helpful. Cost reports are submitted annually by ICFs/MR for the common reporting year of January 1 to December 31. The common rate year of October 1 to September 30, lags the report year by nine months. The submitted cost reports are desk audited to determine allowable operating costs and subject to various cost category limitations. Similarly, property costs including depreciation, interest, and lease expenses are reviewed, and subjected to cost limitations such as investment limits, debt limits, interest rate limits, and down payment requirements. The property rate may also be adjusted for certain life safety code changes. Payment rates are set for the rate year of October 1 to September 30 following the cost reporting year by adjusting per diem costs for inflation. These payment rates are subject to appeal, and may be adjusted retrospectively for field audit and appeal resolutions.

The total payment rate for ICFs/MR is the sum of the total operating cost payment rate, the special operating cost payment rate, and the property related payment rate. The rate may also include a program operating cost adjusted for recognized deficiencies or need determinations resulting from governmental programmatic reviews. These three rates can be summarized as follows:

The reports must cover the reporting year ending December 31, except that for reporting years ending on or after December 31, 1987, (effective January 19, 1988) a provider operating a facility that is attached to a nursing home that is reimbursed under the rate setting requirements for nursing homes may elect to report the facility's costs and statistical information for the period covered by the nursing home's reporting year. If a certified audit has been prepared, it must be submitted with the cost report.
